

Outlet number?	Start time? (24hr clock)	Start date? (ddmm)	Duration? (hrs)	Flow rate? (Litres/sec)	Number of Repeats?	Interval? (days)
Example 1.: If on the 12 th November you plan your water order for Saturday 15 th November on outlet 1 for 16 litres/second for 7 days from 5pm to 8am ...						
1	1700	1511	15	16	6	1
Example 2.: If on the 13 th November you plan your water order for Sunday 16 th November on outlet 2 for 25 litres/second for 4 1/2 days continuous (around the clock) watering ...						
2	1700	1611	108	25	0	-
Example 3.: If on the 14 th November you plan your water order for Thursday 20 th November on outlet 1 for 16 litres/second for 3 consecutive Thursday nights from 7pm to 7am						
1	1900	2011	12	16	2	7

* Remember to allow sufficient notice when planning your water orders.

Your '**user (client) number**', '**p.i.n.**' and '**outlet number**' will have been provided to you by our staff. If you have not received them, or have misplaced them, please contact our offices.

When Streamline asks you to enter the '**start time**', it is asking what time of day you intend to commence taking water. Streamline uses a twenty-four hour clock system. For example ... if you intend to start taking water at 4:00 pm, then you will need to enter '1600' followed by the hash ('#') key via your telephone keypad.

When Streamline asks you to enter the '**start date**', it is asking for the date that you intend to commence taking water. Streamline is expecting you to enter a four-digit number expressing the day and the month. For example ... if you wish to commence on the 7th of January then you will need to enter '0701' followed by the hash ('#') key via your telephone keypad. If you wish to commence on the 23rd of November then you will need to enter '2311' followed by the hash ('#') key. Please keep in mind that you will need to allow for the required period of notice for the irrigation area in which you are taking water. Also, your order must not commence (or end) more than thirty days after the day on which you ring to place it.

When Streamline asks you for the '**duration**' of your order, it is asking how many continuous hours you plan to be taking water. For example ... if you intend to take water for 12 hours each night for any number of nights, then you will need to enter '12' followed by the hash ('#') key via your telephone keypad. If, on the other hand ... you wish to irrigate continuously from Friday evening at 1800 until the following Monday morning at 0600 (a duration of 60 hours) then you will need to enter '60' followed by the hash ('#') key.

When Streamline asks you to enter your proposed '**flow rate**', it is NOT asking the volume of water you intend to use, but rather the rate (in litres per second) at which you intend to use it. For example ... if your irrigator uses water at a rate of 25 litres per second, then you will need to enter '25' followed by the hash ('#') key. If you are not sure how to calculate how many litres per second you will be using, then please contact PVWater staff for assistance.

Streamline will ask you how many times you would like your order to be '**repeat**'ed. If you don't wish to repeat your order then you should enter '0' followed by the hash ('#') key. Streamline will then read your one-off order back to you and ask you to confirm the details by selecting '1' followed by hash ('#') on your keypad. If, however, you require your order to be repeated a number of times, then you should enter the number of repeats you require, followed by the hash ('#') key. For example ... if you are placing an order for seven consecutive periods then Streamline is expecting you to request that your order be repeated '6' times. Remember, Streamline will not accept your order if it ends more than thirty days after the date you call.

If you have requested that your order be repeated, Streamline will ask you to tell it the appropriate '**interval**'. This is the number of days from the commencement of the first period to the commencement of the second period. For example ... if your order is to be repeated each day (or night) at the same time, then the interval between repeats should be entered as '1' followed by the hash ('#') key. Another example might be an order which is to be repeated every Friday night ... the interval in this case would be '7' followed by the hash ('#') key. Once you have entered this information, Streamline will read your order details back to you and ask you to confirm them by pressing '1' followed by the hash ('#') key via your telephone keypad. Once again, Streamline will not accept your order if it ends more than thirty days after the date you ring.
