Conditions for Seasonal Assignment/Temporary Transfer of Water Allocation

Pioneer River Water Supply Scheme

Seasonal Assignment or Temporary Transfer?

Under the Pioneer Valley Resource Operations Plan (ROP), *Seasonal Assignment* is required whenever water is transferred from one Water Allocation holder to another or from one ROP zone to another.

Pioneer Valley Water requires that a *Temporary Transfer* be completed to transfer water from one Irrigation Area to another. We need this information to compare water usage against available water, and to allow for distribution losses assigned under the ROP.

Pioneer Valley Water has prepared this single application form to cater for both types of transactions, to avoid the possibility that the incorrect form might be used inadvertently.

Assignment Volumes

The Assignor's remaining allocation for the water year will be reduced by the Seasonal Assignment/Temporary Transfer volume. As indicated above, the water available to the Assignee will be increased by this volume, less any amount for delivery losses.

It is the responsibility of the Assignor to ensure that the Seasonal Assignment/Temporary Transfer volume indicated on this application form is available for assignment/transfer, and does not cause the Assignor to exceed their available allocation for the current water year. By signing this application, the Assignor warrants that the water is available for Seasonal Assignment/Temporary Transfer.

Charges

An Application for Seasonal Assignment/Temporary Transfer of Water Allocation will not be approved if either applicant has outstanding water charges at the time the application is submitted. The Assignor's Access Charges will not be reduced as a result of this Seasonal Assignment/Temporary Transfer.

Usage charges applicable to the location in which the water is used will be applied for all water taken. In addition to water charges, Pioneer Valley Water may require payment by the proposed Assignee, of an administration charge or other charge in relation to this application. The Assignee will be advised if any such charges are applicable at the time of lodgement. By signing this application, the Assignee warrants to pay all charges in relation to the Seasonal Assignment/Temporary Transfer.

Water Use

Water assigned under this application must only be used in accordance with an existing supply arrangement with Pioneer Valley Water.

Privacy

By signing this application both the Assignor and the Assignee acknowledge that in the case of a Seasonal Assignment of Water Allocation, their names and addresses may be forwarded to the state government together with the details of this transaction.
